Summary

Software QA Engineer with over 3 years of experience ensuring quality for web and mobile applications through Manual, API, Automation, Integration, and Performance Testing. I prioritize product quality by combining technical expertise with a focus on user experience. Experienced in UI Automation using Playwright and API Testing with Postman across all SDLC stages. Skilled in designing comprehensive test plans, executing test cases, and identifying critical issues to enhance product performance. Proficient in both manual and automated testing methodologies, leveraging AI Agent Tools such as Claude CLI and Gemini CLI to improve testing efficiency. Committed to continuous learning, embracing challenges, and exploring AI-driven approaches to deliver high-quality software solutions.

Experience

Software QA Engineer, **Shikho Technologies BD Limited**

June 2023 – Present

Shikho is one of the largest ed-tech platform in Bangladesh, trusted by more than 3 million students and backed by over 5 million app downloads on the Google Play Store

- **Test Case Design & Defect Management:** Built over **3730** test cases for Shikho App, Web Portal, Website, CMS, ES-hop, and Bohubrihi covering **32** features, and reported over **1601** issues with around **1340** resolved, contributing to **84%** bug-free releases
- **UI Automation & Test Framework Development:** Automated Web UI of Shikho CMS on multiple modules using **Playwright** and developed more than **500** test cases using **Page Object Model** and Helper Function, utilizing **AI Agent Tools** such as **Claude CLI, Gemini CLI, Github Copilot** increasing test coverage and reducing manual testing effort by **70%**
- **Grey-Box & API Integration Testing:** Performed **Grey-Box** Testing and API Testing on **REST and GraphQL APIs** by validating API responses, headers, payloads, and backend data flow during user interactions to identify frontend-backend integration issues using **GraphQL Inspector, Postman, and Android Studio Logcat**
- **Requirement Analysis & Test Planning:** Analyzed and gathered requirements from **PRDs (Product Requirement Document)** and **Figma** designs to ensure complete understanding of functional and nonfunctional requirements of a feature before testing
- **Cross-Functional Collaboration & Defect Management:** Attended in daily stand-up and end-of-day meetings to provide task updates, discuss blockers, and align team priorities while actively reporting, tracking, and validating bugs using ClickUp by collaborating closely with Developers and Product Managers to make sure the issues were fixed and checked on time
- **Payment Gateway Integration Testing:** Performed third Party Payment System Integration Testing using **BKash** and **SSLCOMMERZ** on Shikho APP and Web Portal to validate secure and seamless transactions
- **GitHub Branch Management:** Maintained automation test code in GitHub by managing separate branches and integrating updates with the main branch using **GitHub Actions**
- **Mentorship:** Guided **Two newly onboarded** QA team members on Manual Testing practices and provided knowledge transfer on the business workflows of the Shikho App and Shikho Web Portal

Technical Skills

Manual Testing Skills: Test Case Writing, Software Requirements Gathering, Product Requirement Document Analysis, Attention to Detail, Black Box Testing, Android Testing, Web Testing, Bug Tracking, Regression Testing, Sanity Testing

AI Tools: Claude CLI, Gemini CLI, Github Copilot

Programming Languages: C, Java, SQL, Javascript

Bug Reporting Tool: ClickUp

Source and Version Control: Git

Automation Testing Tool (Advanced): Playwright (Page Object Model)

API Testing Tool (Advanced): Postman, GraphQL Network Inspector

Performance Testing Tool (Intermediate): JMeter

Personal Projects

Sauce Demo UI Automation Using Playwright

[Repository](#) 

- Automated Sauce Demo e-commerce flows (Login, Cart, Checkout) using Playwright with JavaScript and Page Object Model
- Managed test code via GitHub with branching strategy, assisted by GitHub Copilot AI
- **Tools & AI Agent Used:** Playwright, JavaScript, Git, GitHub, Github Copilot

API Testing – Restful Booker Application

[Repository](#) 

- Performed end-to-end API testing on Restful Booker using Postman, covering POST, GET, PUT, PATCH, and DELETE methods
- Designed data-driven test cases to validate request/response structure, status codes, headers, and authentication with structured documentation
- **Tools Used:** Postman

BlazeDemo Performance Testing Using JMeter

[Repository](#) 

- Performed performance testing on the BlazeDemo web application using Apache JMeter to evaluate response time, throughput, and scalability under load
- Generated detailed performance reports and CSV logs to analyze bottlenecks and validate system stability under stress
- **Tools Used:** JMeter

Manual Testing Project on Gorillamove: Grocery Delivery Website

[Repository](#) 

- Designed and documented comprehensive test scenarios and test cases covering functional, UI, and integration testing of the Gorilla Move Grocery web responsive and mobile responsive
- Executed test cases and recorded results in an organized and traceable format in EXCEL
- **Test Deliverables:** Test Plan, Test Case Documentation, Test Case Report, Bug Reports, Test Metrics, Mind Map

Certification

Claude 101 – AI Assistant Fundamentals

[Link](#) 

Issued by Anthropic | May 2026

Achievements

Values Award

[Link](#) 

Received a Grow 100X Values Award 2025 for outstanding performance and dedication to excellence

Education

Bachelor of Science in Computer Science and Engineering, **Ahsanullah University of Science and Technology**

April 2017 – Jan 2022

- CGPA: 3.336/4.00
